ANCHOR 

Ice Melter Premium

Effective to -31°C (-24°F)

Anchor ice melting products are the safer way to go when dealing with dangerous conditions caused by ice and snow in walking, parking and loading areas on your premises.

Anchor Premium Ice Melter contains a unique blend of high performance ice melting chemicals, that, when combined, produce a superior ice melting product. Works faster and at temperatures when other products have stopped working. Plus, it's safe to use around children and pets.

Recommendations

For best results, remove existing loose snow and slush from area to be treated prior to application of *Anchor Ice Melter Premium*. Evenly sprinkle *Anchor Ice Melter Premium* on desired surfaces. Melting should begin immediately. Once snow and ice have been melted, shovel off the slush. Thick accumulations may require additional applications. To assure even and complete coverage, use a broadcast spreader.

Notice: Concrete surfaces which have been poorly constructed, are not air entrained, or of sufficient age, may become damaged through prolonged application. To minimize this effect, remove melted ice and snow soon after application. This product has no adverse effect on asphalt. Not recommended on concrete that is less than two (2) years old, or that was not properly mixed, finished, or cured. May be harmful when used excessively or repeatedly applied.

Physical Properties

Appearance: Purple

Odour: None

ENVIRONMENTALLY-FRIENDLY!
SAFE TO USE AROUND CHILDREN AND PETS!

EFFECTIVE TO -31°C (-24°F)

ANCHOR ICE MELTER PREMIUM

- A proprietary formula of magnesium chloride, calcium chloride, potassium chloride, CMA and sodium chloride
